KNOWLEDGE

- App development in **React** with **NextJs**, consuming own and third party **RESTful APIs**.
- Creation and maintenance of **NodeJS** Servers with **Express**.
- Data persistence in **MongoDB** with **Mongoose**.

INTEREST

I'm looking forward to joining a team where I can contribute to the design and implementation of bleeding-edge software solutions.

Also, I'm eager to deepen my knowledge in backend development, as well as application scaling and maintenance.

PROFESSIONAL EXPERIENCE

[Integrity Seguros](#)

Analyst Programmer Jr. (Oct 2020 - Currently)

I'm currently administrating the [Salesforce](#) platform, giving support and delivering new features for different areas, such as surveys creation, automated mail delivery, workflows, approvals, reports, flows, standard panels dashboards in Analytic Studio, etc.

I am also responsible for running and maintaining most of the company's bots, which were programmed in [Automation Anywhere](#) version 11.

EDUCATION

[Instituto Tecnológico Beltran](#)

(2020 - Currently)

Systems Analyst - [Second Year]

HOBBIES

- > Software development
- > Arduino
- > PC Gaming

LANGUAGES

- > English (Intermediate)
